Supt. J. L. Gray read Governor's Cox's proclamation together with the subjects for discussion furnished by members of the State School Survey.

This was followed by ten minute addresses as follows: The School, by Rev. Earl Lea. The School Garden, by Rev. L. W.

Parents Visiting the School, by J. G. Good Roads and the Country School

by David Klingensmith. What the Ohio Legislature is doing for the School, by Representative

Percy Tetlow. All of whom had a good word for Education. The exercises were interspersed with music by O. P. Moore's orchestra, composed of O. P. Moore, violin; J.

G. Smith, trombone; James Paisley, cornet-assisted by E. H. Hughes, cornet, and Thomas Murphy, drums and traps, of Niles. Prof. Gray spoke along the line of

centralized schools and an outline of school history, including readings fur-nished by the state.

Rev. Gross spoke along the line of Agriculture in the Schools, and incidentally about the Buckeye Boys' Corn Special Tour of five trains which go to Washington City, Dec. 1-7, and said parts "It is gratifying to note the widespread interest being manifested in this movement by educators and intelligent parents who know the nature of boys and girls and who comprehend the purpose of this movement. This trip to the National Capital is something more than a pleasure trip. It vises to prove the greatest Rural Life Boost ever experienced by Ohio. Every farm boy and girl entertains a concerning life. In nine cases out of ten this curlosity will be satisfied. It was merely a question as to whether it is satisfied wisely or otherwise. Every item of sight-see-ing and hearing of this Buckeye Boy trip is planned for a purpose. These farm boys and girls will see the attractions of the city, the rush, the power, the grandeur. They will likewise see the armies of toilers in mills and factories, the tenements with their sad humanity. From the lips of men who have experienced both farm and city life they will hear the I firmly believe that the trip to Washington to those boys and girls will prove an effectual stick to the

farm incentive." Klingensmith was given the subject "Good Roads and the Country School"-the only school that is really contemplated by this "Survey." After relating the difficulties encountered with school life in the country, he suggested that if the millions of dollars wasted annually upon the death dealing battleships were expended upon the highways of the country, the result would soon be felt in our pub-lic school attendance. The best American blood is taken to the front and shot at, leaving the cripples and other infirmaties at home to father and mother the coming generations.

The exercises commenced at 7:30 and adjourned at 10 p. m., giving as good satisfaction as the average ture course attraction, besides being free. Prof. Gray extended thanks to the audience for their close attention and good behavior, to the orchestra for their entertaining music and to speakers for "free delivery of studied information.

Percy Tetlow did not state specififor the country schools of the state, but suggested that the state school fund to one general fund out of which all the needs for school purposes be taken per capita for city and country schools, alike. Mr. Tetlow also favored free text books for pupils and them published by the state

printer. The first School Survey day well observed in all the schools of Salem Friday night. There was a large attendance of interested persons, and Supt. Allan was elected delegate to State Survey Congress. Salem have always taken advanced ground upon educational matters, but unfortunately the School Survey does cities and large towns include which are able to care for themselves.

Lectonia did not observe Survey day in their schools, but substituted an oriental operetta, called "In India, the opera house Friday and Saturday nights. Forty-five young ladies and eight young men, all of Leetonia and all good singers, held a sort of "sangerfest," which has been highly complimented by all lovers of music
